PROJECTS

What's Bugging You?

- Web application with a React/Redux front-end and Rails backend.
- Wellness app that lets users log, and later react to, complaints about various spheres of their life to track if their feelings about each complaint improved or worsened over time.
- Uses multiple visual cues to help users examine their complaints and reactions to discern patterns in their behavior

Art NYC

- A monolithic Rails application that utilizes the NY ArtBeat API
- Lets users browse art events from galleries, museums, exhibitions and more by querying the NY ArtBeat API
- Users can save event they're interested in attending, as well as create, post, and delete their own custom events

Fight Simulator

- A React application with a Rails backend
- Users create their fighters and moves with online images and assign power and usage points, or select pre-existing fighters
- Users could then pit their champions against each other in an interactive, turn-based fight

EXPERIENCE

Software Tester — *Epic*, Verona

June 2015 - June 2017

Worked as a Software Tester on the Labor and Delivery and Admission-Discharge-Transfer modules

- Regularly met with programmers throughout the development cycle, and participated in daily stand-up meetings
- Provided on-site support to educate doctors, nurses and other clinicians in using Epic software

Research Analyst —*Insurance Archaeology Group*, New York

February 2018 - April 2018

Assisted in all aspects of our insurance archaeology projects, including project management, corporate research, and client communication

SKILLS

Proficient in **Ruby**, **Rails**, **JavaScript**, and **React/Redux**

Demonstrated success in explaining complex subjects in relatable terms

Managing long-term projects with high quality and adherence to timelines

A history of self-directed research across multiple disciplines

AWARDS/ACHIEVEMENTS

Lowest missed bugs ratio on my teams at Epic
